Introduction

The purpose of this Tenant Agreement is to define the responsibilities and services provided by the Expedition 0 platform to the squidfall application. This Tenant Agreement focuses solely on Expedition 0's services. Expedition 0 is a platform within the cARMY Azure Gov environment and its goal is to enable consistent and secure cloud onboarding of data science applications ISO AI2C's purpose of delivering AI solutions at speed in support of Army missions. Expedition 0 will provide some functional services and support. PLEASE NOTE: This document will evolve over time, as new services, capabilities, coverage, and responsibilities are introduced, this document is reviewed annually. Any revision to this document will result in updates being sent to all Tenant Owners for situational awareness.

Roles & Responsibilities

Authorizing Official (AO)

SES Joseph Welch (joseph.d.welch16.civ@army.mil)

- Ensures all appropriate RMF tasks are initiated and completed, with appropriate documentation, for assigned IS and Platform Information Technology (PIT) systems. Monitor and track overall execution of system-level Plans of Action & Milestones (POA&M), promote reciprocity.

Information System Owner (ISO)

CPT Andre Michell (andre.j.michell.mil@army.mil)

- Holds statutory, management, or operational authority for specific information to establish the policies and procedures governing its generation, collection, processing, dissemination, and disposal of the system.

Program Manager (PM)

CPT Andre Michell (andre.j.michell.mil@army.mil)

- Responsible for the overall procurement, development, integration, modification, or operation and maintenance of the IT system.

Information System Security Manager (ISSM)

CW3 Vic Fernandez III (victor.fernandez19.mil@army.mil)

- Serves as a principal advisor on all matters, technical and security, involving the security of is the Expedition 0 system while ensuring physical and environmental protection, personnel security, incident handling, and security training and awareness are completed.

Information System Security Officer (ISSO)

CW3 Jilly Gonzalez (jilly.gonzalez.mil@army.mil)

- Responsible for maintaining the appropriate operational security posture for an IS or program.

System Administrator (SA)

CW3 Justin Whitten (justin.whitten.mil@army.mil)

- Responsible for the team that applies technical functionality and security on IS.

Tenant Owner

CPT Joe Dee (joe.dee.mil@army.mil)

- The Tenant Owner is responsible for the security within their application, even if Expedition 0 provides foundational security services (e.g., "The Tenant Owner is responsible for securing their application code and data.").
- The Tenant Owner is responsible for scanning their application code and remediating findings and vulnerabilities. Critical and CAT Is need to have mitigations in place, and comments prepared for a POA&M. The comments should indicate the specific mitigations in place that lower the risk. Residual Risk should follow the NETCOM guidance for Risk Analysis if not fully remediated. Threshold not specific but documentation requirements will be set.
- The Tenant Owner is responsible for ensuring their application complies with all relevant regulations and policies to include ECMA enforced Azure Policy and Application specific STIGs.
- The Tenant Owner is responsible for monitoring their application's performance and responding to alerts. Some alerts may trigger Expedition 0 team responses. For example, if an Azure Alert is triggered that goes to the Expedition 0 ISSO.
- The Tenant Owner must notify Expedition 0 of any planned changes to their application that may impact Expedition 0 services.
- The Tenant Owner must notify Expedition 0 of version updates to applications that include feature additions and new capabilities.
- The Tenant Owner must notify Expedition 0 if new versions require new infrastructure or updates to the Expedition 0 system itself.

Services Provided

Resources

- If Compute resources are required for onboarding applications, the Tenant Owner will notify the Expedition 0 team.
- Expedition 0 manages the AKS Platform, however, applications that leverage containers would maintain their own namespace.

Storage

- Storage will be provided as needed and as approved on the approved Hardware and Software list. For example: Azure Storage accounts, Azure PostgreSQL Flexible Server, Azure MySQL, Azure SQL.

Networking

- Expedition 0 will provide a dedicated subnet as needed within the Expedition 0 VNet, with appropriate Network Security Group rules.

Identity, Credential, and Access Management (ICAM)

- Expedition 0 leverages Azure Entra ID for integrated authentication, and KeyCloak. Application access will be managed through EAMS-A or KeyCloak.

Monitoring & Logging

- Expedition 0 provides integration with Azure Monitor for logging and alerting.
- Application logs will be stored in a dedicated Log Analytics workspace.
- Review ECMA MOU for additional monitoring and logging capabilities.

Security Services

- Expedition 0 interacts with cArmy, ARCYBER and C5ISR for security services and monitoring.

Data Services

- Expedition 0 data backup and recovery procedures are outlined in the Expedition 0 Contingency Plan.

Cost Allocation

- Although there is no specific cost allocation or chargeback, tagging will be used to help identify anomalies and namespace labeling in AKS could set the stage for chargebacks if needed. Tenant Owners will be notified before any chargeback changes are put in place.

Support & Escalation

Support Channels

- Use the ticketing system to create trouble tickets, change requests, or general questions.

Change Control

Process for Changes

- All changes must follow the process outlined in the Change Management Plan.

Impact Assessment

- A Security Impact Assessment is required if the proposed change includes a Security Relevant Change.

Related Documentation & Resources

ECMA Tenant MOA

- For information regarding services provided directly by the ECMA cArmy environment, please refer to the ECMA Tenant Memorandum of Agreement, available at [\[Link to ECMA MOA\]](#).

Expedition 0 Documentation

- Link to any relevant Expedition 0 documentation (e.g., API documentation, best practices guides).
- Azure Government Documentation: [Link to relevant Azure Government documentation.](#)

Signatures

The undersigned representatives have reviewed this Tenant Agreement and agree to abide by the terms as identified in this document. This document shall be reviewed not later than twelve months from date of signature.
